ERM-AD482k

DECLARATION OF CONFORMITY AND ORIGIN

This is to certify that the materials ERM-AD482ka, b and c:

Are a set of sterile solutions of plasmid DNA contained in a screw-capped tube and produced at our premises.

The starting material was provided by the European Union Reference Laboratory for the detection of Animal Proteins in feedingstuffs (EURL-AP) (Gembloux, Belgium).

The DNA was chemically purified and has no infective and no toxic properties. No living organisms (prokaryotes and/or eukaryotes) are included in the samples.

Based on the available information and knowledge, any infectious danger resulting from an exposure to the material can be excluded.

Robert KOEBER
